Description: Favourite Places brings together field and compositional recordings depicting places of importance and significance within the lives of contemporary artists.

Release date: November 9th 2009

2 | FAVOURITE PLACES

The second instalment of the series invites contemporary artists to capture field recordings and create a composition depicting the essence of their favourite place. The sounds emerge from city streetscapes, deserted factories; isolated countryside and a homely bedroom. The aim has been to enable a creative interaction between external and internal realities. It is hoped that the pieces will inspire the audience to become increasingly active listeners whilst experiencing their own favourite places.

We appreciate your support and look forward to your feedback.
