Description: The sixth update of the Endless Endless project; an ever expanding organic arrangement space.

Release date: August 3rd 2010

ENDLESS ENDLESS (V6)

Ambient and micro-sound artists are encouraged to send 120 second tracks of ambient audio to Audiobulb. Tracks are then mixed alternatively into the start or the end of the piece in a manner that expands Endless Endless. This creates an inventive, interesting, and potentially endless piece of ambient and micro-sound based music by combining the unique ideas of different people around the world. The project is entirely non-profit and anyone can send in a piece for consideration. We appreciate your support and look forward to your feedback.
